Ministry of the Environment and Climate Change

General Information and Instructions

General

Anyone who has outstanding environmental issues that have not been addressed through the Class Environmental Assessment process can request the Minister of the Environment and Climate Change to make an order under Part II of the Environmental Assessment Act. This is known as requesting a Part II Order.

A Part II Order request should be submitted after the proponent has issued the Notice of Completion for a Class Environmental Assessment for a project. The request should be submitted within the review period/comment period outlined in the Notice of Completion.

The Ministry recommends that you follow the process set out below before submitting a Part II Order request:

- Participate in the consultation opportunities provided to the public within the Class Environmental Assessment process
- Engage in discussions with the proponent to try to address and resolve your concerns

A Part II Order request should not be submitted for the sole purpose of delaying, stopping, or frustrating the planning and implementation of an undertaking proceeding under a Class Environmental Assessment process. The Minister may consider the efforts of the requester to resolve the concerns directly with the proponent when deciding whether to make an order.

Questions regarding the completion and submission of this form should be directed to a Customer Service representative at the Client Services and Permissions Branch at 416-314-8001 or 1-800-461-6290.

Step 1 - Get the Facts

2206E (2018/05)

- Class Environmental Assessments are used for projects that the Ministry of the Environment and Climate Change considers routine, with predictable and manageable effects on the environment.
- A Part II Order request will not stop a project from proceeding. The Minister has four options when deciding a Part II
 Order request:
 - To request mediation between you and the proponent to help address your concerns before making a decision
 - To deny the request
 - To deny the request but require the proponent to fulfill additional conditions before the project can proceed, such as further studies or more public consultation
 - To require the proponent to conduct a higher review of the project through an Individual Environmental Assessment;
 this happens only in rare and exceptional cases.
- Key factors that the Minister may consider when looking at a Part II Order request are:
 - whether the project has the potential to pose significant adverse effects on the environment
 - how the project is significantly different from other projects in its class
 - whether the process for the Class Environment Assessment was adequate.
